

# TUNA BOSTANCIBAŞI

AI Integration & Automation Specialist

538-722-72-58

tunabstncx@gmail.com

Konya, Türkiye

## SUMMARY

Product-oriented developer with experience building and evaluating AI-supported systems, automation workflows, and structured logic pipelines. Skilled at designing and integrating AI tooling (n8n, Claude Code agents), developing backend services (Node.js), and creating structured annotations that explain model reasoning and decision pathways. Proven ability to combine technical rigor with clear communication and documented logic for AI training and quality assurance workflows.

## EDUCATION

Pamukkale University / Denizli  
(2020-2025)

## PROFESSIONAL EXPERIENCE

### AI & Automation Workflows:

- Designed and implemented automated workflows using n8n to integrate internal and third-party services into coordinated task pipelines.
- Built and maintained Node.js REST APIs supporting structured workflow orchestration and authenticated service interactions.
- Developed Claude Code-based agents to enable autonomous resolution of structured logic tasks.

### OmTun Labs – Co-Founder & AI Workflow Engineer

2024 – Present | Remote

- Created AI-assisted tooling using Claude Code and LangChain-inspired patterns for multi-step reasoning and task evaluation.
- Built CLI and automated connectors to orchestrate complex tasks, improve pipeline efficiency, and reduce manual intervention.
- Collaborated with cross-functional stakeholders to document logic structures, evaluation criteria, and expected system outcomes.

## PROJECTS

### SorsanaApp — AI-Integrated Peer Learning App Product Owner & Full-Stack Developer

A peer-based question solving platform where students share questions and receive AI-supported explanations.

- Developed cross-platform mobile app using React Native
- Built Node.js backend for question flow, user interaction, and content management
- Integrated AI-powered solution support for enhanced learning experience

### AI Evaluation & Workflow Design Tool

- Designed automated evaluation pipelines that assess model outputs against structured criteria.
- Created documentation templates to capture decision logic and scoring rubrics for annotation tasks.

## TECHNICAL SKILLS

n8n • Claude Code • LangChain patterns • Node.js • MongoDB • MS SQL Server • Git • Postman • Agile documentation

## LANGUAGE

Turkish - Main Lang

English - B2 Level
