Tuna Bostancıbaşı

Computer Engineer

Full Stack Development · React Native · Laravel

Konya, Türkiye · +90 538 722 72 58 · bostancibasituna58@gmail.com · tunabostancibasi.com · github.com/Tunacodin · linkedin.com/in/tuna-bostancibasi

PROFILE

Computer Engineer building mobile and web products end to end as a full stack developer. I have contributed to technical development and product processes across projects in diverse domains — education technology, finance, inventory management, and digital platforms. I aim to build user-centered, scalable, and sustainable solutions.

EXPERIENCE

Ilgar Teknoloji — Full Stack Developer

Jul 2026 – Present

- Building SuPublic end to end, a platform that maps public water points across Türkiye.
- Own the React Native / Expo mobile app together with the Laravel REST API and MySQL data layer.
- Responsible for the admin panel, website, OTA updates, and app store releases.

Divizyon — Community Lead · Software Development

Open Innovation Platform · Feb 2026 – Jul 2026

- Led a community spanning the digital product, experience design, and content production disciplines.
- Planned and coordinated events, workshops, and sprint organizations.
- Managed prototype-to-product development processes and mentor programs.

Füzyonist — Mobile Developer

Multi-disciplinary consulting agency · Oct 2025 – Mar 2026

- Built React Native–based mobile apps for client MVP and product development projects.
- Actively contributed to mobile development and delivery processes in Agile teams.
- Worked on REST API integrations, performance improvements, and app architecture.

Phinia Delphi Technology — React Native Intern

İzmir · 2024

- Built new features in a React Native codebase for the enterprise automotive sector.
- Refactored existing modules to improve maintainability and sustainability.
- Contributed to bug fixing and performance improvement work.

KodPit Software — Mobile Developer Intern

Denizli · 2023 (4 months)

- Built mobile screens for client projects with React Native.
- Implemented REST API integrations.
- Took part in agile development processes within the team.

SELECTED PROJECTS

SuPublic — Map of public water points in Türkiye

Live · iOS & Android · Web

Full Stack Developer · Ilgar Teknoloji

React Native · Expo SDK 55 · TypeScript · Laravel · MySQL · Firebase · EAS Update

A public-good platform that maps fountains and water points across Türkiye and lets users suggest new ones. I rebuilt the mobile app and run the Laravel API, admin panel, and website, along with OTA updates and store releases.

Sorsana — AI-powered social question-solving platform

iOS & Android

Lead Mobile Developer

React Native · Expo SDK 55 · TypeScript · Zustand · TanStack Query · React Hook Form · Zod · Skia

A social learning platform where students share questions by taking photos, receive AI-powered explanations, and interact within a community. I built the mobile app's architecture, navigation, authentication, state management, and release processes end-to-end, and took an active role in the admin panel and release management.

Verona — Art school management system

Mobile & Desktop

Full-stack Developer

React Native · Expo Router · Electron · TypeScript

A management system that digitizes art schools' student registrations, instructor management, class scheduling, and session-based payment processes. I developed the mobile app and the desktop panel on a shared backend, enabling every operation to be managed from a single platform.

Yalın Depo — Smart warehouse & stock management platform

Mobile & Web

Full-stack Developer

React Native · React · Three.js · Expo Camera · SQLite

A warehouse management platform developed around lean-manufacturing principles. It digitizes warehouse operations with barcode scanning, critical-stock tracking, a color-coded shelf system, and real-time 3D warehouse visualization. I took part in developing both the mobile app and the web panel.

Tipbox — Blockchain-based product sharing platform

Team project

Mobile Developer

I worked on the React Native app of a platform that supports product verification and sharing with blockchain technology. I contributed to building mobile screens, Web3 integrations, and various full-stack development.

Savely — Social savings & financial goals app

iOS & Android

Lead Mobile Developer

React Native · Expo Router · Apple Sign-In

A mobile app where users set financial goals and build saving habits through social interaction. I managed authentication, app architecture, release processes, and production builds end-to-end.

Wallpaper Collection — Visual discovery platform

iOS & Android

Lead Mobile Developer

React Native · Expo Router · NativeWind · Expo Image

A mobile app delivering a high-performance visual feed. I built the fluid masonry list, the gesture-based Bottom Sheet experience, and an optimized image-loading pipeline.

TECHNICAL SKILLS

CORE

React Native 0.83, Expo SDK 55, Expo Router, TypeScript

WEB & DESKTOP

React, Vite, Three.js / react-three-fiber, Electron

UI / ANIMATION

NativeWind, Reanimated, Skia, FlashList, Bottom Sheet

LANGUAGES

TypeScript, JavaScript, C#, Java, Python

STATE & FORMS

Zustand, TanStack Query, React Hook Form + Zod

BACKEND

Laravel, MySQL, Supabase, Firebase, .NET 6 Web API, REST, JWT, SQLite

DELIVERY

EAS Build, TestFlight, Google Play Console, Code Signing, OTA

EDUCATION

Pamukkale University

B.Sc. Computer Engineering · 2020 – 2025

LANGUAGES

Turkish — Native · **English** — B2
